# Chapter 1

## Module Index

### 1.1 Modules

Here is a list of all modules:

FakeKey - . . . . .	5
---------------------	---

## Chapter 2

# File Index

### 2.1 File List

Here is a list of all documented files with brief descriptions:

<a href="#">fakekey.h</a> . . . . .	9
-------------------------------------	---

## Chapter 3

# Module Documentation

### 3.1 FakeKey -

yada yada yada

#### Typedefs

- typedef struct [FakeKey](#) **FakeKey**  
*Opaque structure used for all operations.*

#### Enumerations

- enum [FakeKeyModifier](#)  
*enumerated types for #mb\_pixbuf\_img\_transform*

#### Functions

- [FakeKey](#) \* [fakekey\\_init](#) (Display \*xdpy)  
*Initiates FakeKey.*
- int [fakekey\\_press](#) ([FakeKey](#) \*fk, const unsigned char \*utf8\_char\_in, int len\_bytes, int modifiers)  
*Sends a Keypress to the server for the supplied UTF8 character.*
- void [fakekey\\_repeat](#) ([FakeKey](#) \*fk)  
*Repeats a press of the currently held key ( from [fakekey\\_press](#) )*
- void [fakekey\\_release](#) ([FakeKey](#) \*fk)  
*Releases the currently held key ( from [fakekey\\_press](#) )*
- int [fakekey\\_reload\\_keysyms](#) ([FakeKey](#) \*fk)  
*Resyncs the internal list of keysyms with the server.*
- int [fakekey\\_press\\_keysym](#) ([FakeKey](#) \*fk, KeySym keysym, int flags)  
*[fakekey\\_press](#) but with an X keysym rather than a UTF8 Char.*
- int [fakekey\\_send\\_keyevent](#) ([FakeKey](#) \*fk, KeyCode keycode, Bool is\_press, int modifiers)

### 3.1.1 Detailed Description

yada yada yada

Always remember to release held keys

### 3.1.2 Function Documentation

#### 3.1.2.1 fakekey\_init()

```
FakeKey * fakekey_init (
    Display * xcpy )
```

Initiates FakeKey.

##### Parameters

<i>xcpy</i>	X Display connection.
-------------	-----------------------

##### Returns

new [FakeKey](#) reference on success, NULL on fail.

#### 3.1.2.2 fakekey\_press()

```
int fakekey_press (
    FakeKey * fk,
    const unsigned char * utf8_char_in,
    int len_bytes,
    int modifiers )
```

Sends a Keypress to the server for the supplied UTF8 character.

##### Parameters

<i>fk</i>	<a href="#">FakeKey</a> refernce from <a href="#">fakekey_init</a>
<i>utf8_char↔ _in</i>	Pointer to a single UTF8 Character data.
<i>len_bytes</i>	Lenth in bytes of character, or -1 in ends with 0
<i>modifiers</i>	OR'd list of <a href="#">FakeKeyModifier</a> modifiers keys to press with the key.

## Returns

### 3.1.2.3 fakekey\_press\_keysym()

```
int fakekey_press_keysym (
    FakeKey * fk,
    KeySym keysym,
    int flags )
```

[fakekey\\_press](#) but with an X keysym rather than a UTF8 Char.

## Parameters

<i>fk</i>	<a href="#">FakeKey</a> refernce from <a href="#">fakekey_init</a>
<i>keysym</i>	X Keysym to send
<i>flags</i>	

## Returns

### 3.1.2.4 fakekey\_release()

```
void fakekey_release (
    FakeKey * fk )
```

Releases the currently held key ( from [fakekey\\_press](#) )

## Parameters

<i>fk</i>	<a href="#">FakeKey</a> refernce from <a href="#">fakekey_init</a>
-----------	--------------------------------------------------------------------

### 3.1.2.5 fakekey\_reload\_keysyms()

```
int fakekey_reload_keysyms (
    FakeKey * fk )
```

Resyns the internal list of keysyms with the server.

Should be called if a MappingNotify event is recieved.

**Parameters**

<i>fk</i>	<a href="#">FakeKey</a> refernce from <a href="#">fakekey_init</a>
-----------	--------------------------------------------------------------------

**Returns****3.1.2.6 fakekey\_repeat()**

```
void fakekey_repeat (
    FakeKey * fk )
```

Repeats a press of the currently held key ( from [fakekey\\_press](#) )

**Parameters**

<i>fk</i>	<a href="#">FakeKey</a> refernce from <a href="#">fakekey_init</a>
-----------	--------------------------------------------------------------------

**3.1.2.7 fakekey\_send\_keyevent()**

```
int fakekey_send_keyevent (
    FakeKey * fk,
    KeyCode keycode,
    Bool is_press,
    int modifiers )
```

**Parameters**

<i>fk</i>	<a href="#">FakeKey</a> refernce from <a href="#">fakekey_init</a>
<i>keycode</i>	X Keycode to send
<i>is_press</i>	Is this a press ( or release )
<i>modifiers</i>	

**Returns**

## Chapter 4

# File Documentation
