

TinyTapeout 4/5 Demo Board (preliminary)

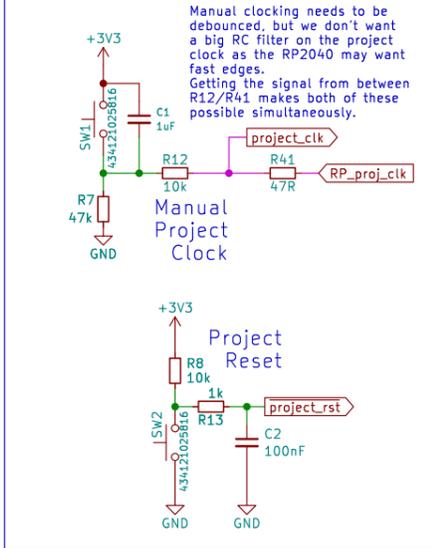

Extensive labelling, designed for TT4+ with new MUX, RP2040 on board, accessed via USB. Project clock from RP2040, external or manual, DIP switches for inputs, 7-segment display (remappable with jumpers) on outputs, full access to 8 in, out and bidirectionals via PMODs, all pins broken out in headers.

Power via +5V USB, or 5V breakout pin. On-board regulation to 3v3 and 1v8. VDDIO is 3v3, including on PMODs.
