

Enable. Enhance. Empower.

Ennovar Support Services

Fully aligned with the needs of today's IT infrastructures, Ennovar Support Services is designed to help you respond effectively to changing demands on your business. By combining Ennovar's unique way of thinking, innovating and working, companies can offload their support services freeing up precious dollars, time and resources at the same time getting the quality services they demand.

The way we think.

Ennovar believes in alternative ways to do things, providing a different way of delivering products and at a cost point that may be more attractive than other options. By working with Ennovar, our customers are able to offload and outsource projects and work that frees up valuable internal resources.

The way we innovate.

Ennovar recognized a need for aligning business needs with training the next generation work force. Located on the campus of Wichita State University, Ennovar has tapped into alternative student manpower, preparing them for an exciting career in the high-tech field.

The way we work.

Ennovar combines Subject Matter Experts – with years of support, hardware, software and network experience – with supervised, trained student technicians to staff our support services team.
